Adam Maulana

Software Engineer

👤 Profile

As a Full-stack Developer with 4 years of experience in online marketing, I have a strong background in Front-End Development, Back-End Development and Cloud Computing. I have learned these skills through my work experience at Relvan Online Marketing and as a Freelance Graphic Web Designer. I also have graduated in Website Application Development from Hacktiv8 Indonesia. My past accomplishments include learning JavaScript ES2016, Version Control with Git, Database SQL, Node JS, Express, Vue.js & Vuex, Test-Driven Development (TDD), Deployment, and Continuous Integration. Moving forward, my goal is to further develop my skills in microservices and pursue opportunities as a Software Engineer.

💼 Employment History

Full-stack Developer at Relvan Online Marketing

January 2018 — December 2023

As a full-stack developer at Relvan Online Marketing, I have been responsible for developing and maintaining web applications using a variety of technologies. This includes front-end development using JavaScript frameworks such as React and Vue, as well as back-end development using Node.js. I have also gained experience in microservices architecture and cloud computing.

- Developed and maintained web applications using JavaScript frameworks such as React and Vue.
- Implemented microservices architecture and utilized cloud computing services to improve scalability and performance.
- Collaborated with cross-functional teams to develop and deploy REST APIs.

Freelance Graphic Web Designer at Self-employed

May 2016 — September 2017

As a freelance graphic web designer, I was responsible for creating visually appealing and user-friendly websites for clients. I utilized my skills in graphic design and web development to deliver high-quality designs that met the client's requirements.

- Developed visually appealing and user-friendly websites for clients.
- Utilized graphic design skills to create engaging and attractive designs.
